PROBLEM (QUADRATIC FORMS Q.2.9)

Find the smaller area enclosed by the circle $\mathbf{x}^T \mathbf{x} = 4$ and the line $\begin{pmatrix} 1 & 1 \end{pmatrix} \mathbf{x} = 2$.

SOLUTION

General equation of circle is

$$\mathbf{x}^T \mathbf{x} + 2\mathbf{u}^T \mathbf{x} + f = 0 \quad (0.0.1)$$

$$\|\mathbf{x}\|^2 + 2\mathbf{u}_1^T \mathbf{x} + f_1 = 0 \quad (0.0.2)$$

$$\mathbf{x}^T \mathbf{x} - 4 = 0 \quad (0.0.3)$$

$$\mathbf{u}_1 = \begin{pmatrix} 0 \\ 0 \end{pmatrix} \quad (0.0.4)$$

$$f_1 = -4 \quad (0.0.5)$$

$$\mathbf{O}_1 = \begin{pmatrix} 0 \\ 0 \end{pmatrix} \quad (0.0.6)$$

$$r = \sqrt{\mathbf{u}_1^T \mathbf{u}_1 - f_1} = \sqrt{4} \quad (0.0.7)$$

$$\Rightarrow r = 2 \quad (0.0.8)$$

From (0.0.8), the points at which circle touches X-axis is $\begin{pmatrix} -2 \\ 0 \end{pmatrix}$ and $\begin{pmatrix} 2 \\ 0 \end{pmatrix}$.

The direction vector of the given line $\begin{pmatrix} 1 & 1 \end{pmatrix} \mathbf{x} = 2$ is $\begin{pmatrix} -1 \\ 1 \end{pmatrix}$.

Fig. 0: Smaller area enclosed by line and circle

To find point **A** and **B**, the parametric form of line is,

$$\mathbf{A} = \mathbf{q} + \lambda \mathbf{m} \quad (0.0.9)$$

$$= \begin{pmatrix} 1 \\ 1 \end{pmatrix} + \lambda \begin{pmatrix} -1 \\ 1 \end{pmatrix} \quad (0.0.10)$$

$$\lambda^2 = \frac{-f_1 - \|\mathbf{q}\|^2}{\|\mathbf{m}\|^2} \quad (0.0.11)$$

$$= \frac{4 - 2}{2} = 1 \quad (0.0.12)$$

$$\Rightarrow \lambda = \pm 1 \quad (0.0.13)$$

$$\mathbf{A} = \begin{pmatrix} 0 \\ 2 \end{pmatrix} \mathbf{B} = \begin{pmatrix} -2 \\ 0 \end{pmatrix} \quad (0.0.14)$$

$$\mathbf{O}_1 = \begin{pmatrix} 0 \\ 0 \end{pmatrix} \quad (0.0.15)$$

$$(\mathbf{A} - \mathbf{O}_1) = \begin{pmatrix} 0 \\ 2 \end{pmatrix} \quad (0.0.16)$$

$$(\mathbf{B} - \mathbf{O}_1) = \begin{pmatrix} -2 \\ 0 \end{pmatrix} \quad (0.0.17)$$

Inner product of $(\mathbf{A} - \mathbf{O}_1)$ and $(\mathbf{B} - \mathbf{O}_1)$ is given as:

$$(\mathbf{A} - \mathbf{O}_1)^T (\mathbf{B} - \mathbf{O}_1) = 0 \quad (0.0.18)$$

Therefore, $(\mathbf{A} - \mathbf{O}_1) \perp (\mathbf{B} - \mathbf{O}_1)$

Smaller area enclosed by circle and line **AB** is:

Area = (Area of circle in 2nd Quadrant) - (Area of right triangle formed by line AB, X and Y axis)

$$Area = \frac{\pi\theta_1}{360}r^2 - \frac{1}{2} \times 2 \times 2 \quad (0.0.19)$$

$$= \frac{90}{360} \times 2^2 - 2 \quad (0.0.20)$$

$$= \pi - 2 \quad (0.0.21)$$

Hence, the smaller area enclosed by the circle

$\mathbf{x}^\top \mathbf{x} = 4$ and the line $\begin{pmatrix} 1 & 1 \end{pmatrix} \mathbf{x} = 2$ is $(\pi - 2)$ square units.
